

Classic Line I

The Classic Line I is defined above all by its balanced sound-characteristics.

The elaborate mounting of the top by means of single woodblocks instead of the woodstrips results in a soft, sensitive tone. As the most advanced neck-body-joint, the Spanish-Neck also adds its part to an improved transmission of sound.

Due to the comparably flat neck with a width of 50 millimeters the playability of the Classic Line I is easy and comfortable.

Tasteful bindings as well as a satin gloss finish create the guitars well rounded appearance and transform it into a little gem.
