

Classic Line Pro

The Spanish-Neck, the most advanced neck-body-joint, is certainly a must for this model.

With the Classic Line Pro the emphasis lies on balance and individual fine-tuning of the top.

In addition to the elaborate mounting of the top by means of little single woodblocks the strength of each of these woodblocks is adapted to the needs of the respective top which is also done with the arrangement of the bracing and the customizing of the braces.

The Shellac hand-polishing of the top – a now rare art – also contributes to the refinement of the sound and at the same time together with the Nitrocellulose finish of back and sides this makes for a fine and noble appearance.
