

# Primera

The starter-model for adolescents and grown-ups is being built as a standard with a 63cm and 65cm scale.

It is very important, especially for the beginner, to play an affordable instrument that inspires through its sound.

Our intention with the development of this model was therefore to create a guitar at a reasonable price where the cost-savings did not impede the substantially important signs of quality of a good instrument as there are good sound, good workmanship, solid woods which all are a 'MUST' as it is with all instruments of a higher price class.

## Specifications:

|                       |   |
|-----------------------|---|
