

Steelstring Ambition Jumbo 12

The Jumbo 12 is the consistent further development of our models Ambition Jumbo and Ambition 12.

For the 17" corpus a sophisticated bracing-system was conceived, which pursues two goals: balanced reinforcement of the sound volume and adaptation to the increased string-tension.

The Jumbo 12 captivates by an enormous and nevertheless differentiated sound, which convinces just like that of his 6-string sister by clear precise basses, a broad mid-range as well as velvety trebles.

We build the Jumbo 12 with a neck width of 50 mm, which can be changed however at no surcharge. As is the case for all ambition models here an individual choice amongst a multiplicity of tonewoods is also offered.

Specifications:

BACK/SIDES:	East Indian Rosewood
TOP:	Sitka Spruce
NECK:	Cedro, spanish constructed heel
