

Steelstring Ambition Jumbo

This Jumbo is based on the Ambition model and also has a Spanish Neck, known in the classic lutherie as the most advanced neck-body joint.

During the conception of the 17" body we went to great length to assure a well-balanced increase of the sound volume. A clear and precise bass, never blurred, a wide midrange and velvety trebles are the trademark of this instrument.

The standard width of the neck of this jumbo is 45mm which can be varied at no extra charge.

A variation in the use of the tonewoods is available as well. This will guarantee a wide sound-spectrum in which every musician can find realized his or her own individual listening preferences.
