

# Steelstring Superior

The Superior originates in elaboration and sound behavior from the Ambition model.

The Spanish neck, known as the most advanced neck-body-joint in classic lutherie is therefore also used as a standard here. The neck width of 45 mm can be varied at no extra charge.

A choice of the most different tone-woods, like Rosewood, Maple, Ovalcol, Mahogany and various others guarantees a broad sound spectrum, in which each musician can find realized his individual hearing preferences.

The Superior differs from the Ambition by Abalone purflings and a Abalone sound hole inlay, a selection of woods in superior quality (AA+), hand polished Nitrocellulose high gloss finish as well as goldplated machine heads with ebony buttons.
